Authentication

Email registration

Login

Verification

Managing user accounts

- No domain needed
- No server needed
- No cumbersome OAuth requests
- No worries about security
- No problems with scalability
- Way less time

What's the
Catch?

1. How much does it cost?
2. What makes it so secure?

How Much Does It Cost?

Free to start

[Firease.google.com/pricing/](https://firease.google.com/pricing/)

What Makes It so Secure?

Google product

2048 keys for the SSL certificates

Sign tokens with SHA256 HMAC Signatures

BCrypt for password storage

Module 1.2: Prerequisites

Prerequisite Skills

Some Android experience

Zero Firebase experience

- Android Version 26
- Firebase Version 11.0.4
- Android Studio Version 2.3
- Firebase SDK
- Google Play Services SDK

Module 1.3: The Story Behind The App
